2.3 – Brainstorming

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

Food Ordering. Consumer Trends: A Simple Look at Choices and Habits Using Tableau

Central Idea

We want to look at food ordering data to see what customers like how they buy how much they spend, how well delivery works and how happy they are with the service. We will use Tableau dashboards to understand this.

1. Customer Demographics

Questions to Explore

Which age group orders food the most?

How do people in age groups order food?

Which group of customers spends the money?

How does the type of company someone works for affect how they order food?

Possible Insights

We want to find out which age group is the active when it comes to ordering food.

We also want to see how different groups of people spend their money on food.

It would be interesting to know which types of food are popular among groups of customers.

2. Food Preferences

Questions to Explore

What kind of food do people like to eat the most?

What are the popular meals to order?

Which types of restaurants get the orders?

Do people in different cities like different types of food?

Possible Insights

We want to know what type of food is in the demand.

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

We also want to find out which type of meal is the popular.

It would be helpful to see if there are any patterns in what people like to eat in cities.

3. Ordering Behavior

Questions to Explore

How much do people usually spend when they order food?

When do people usually order food?

How do customers place orders?

Which meals do people keep ordering again?

Possible Insights

We want to find out when people're most likely to order food.

We also want to see how customers buy food and what they like to order.

It would be interesting to know which groups of customers order food a lot.

4. Revenue Analysis

Questions to Explore

Which type of meal makes the money?

Which type of food sells the most?

How money do we make in each city?

Which type of restaurant does the best?

Possible Insights

We want to know which meals are making the money.

We also want to find out which locations are doing well and where we can grow our business.

It would be helpful to see which types of food are in demand and where.

5. Customer Satisfaction

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

Questions to Explore

How happy are customers with our service on average?

Which meals do customers like the most?

Do people like our service more when they spend money?

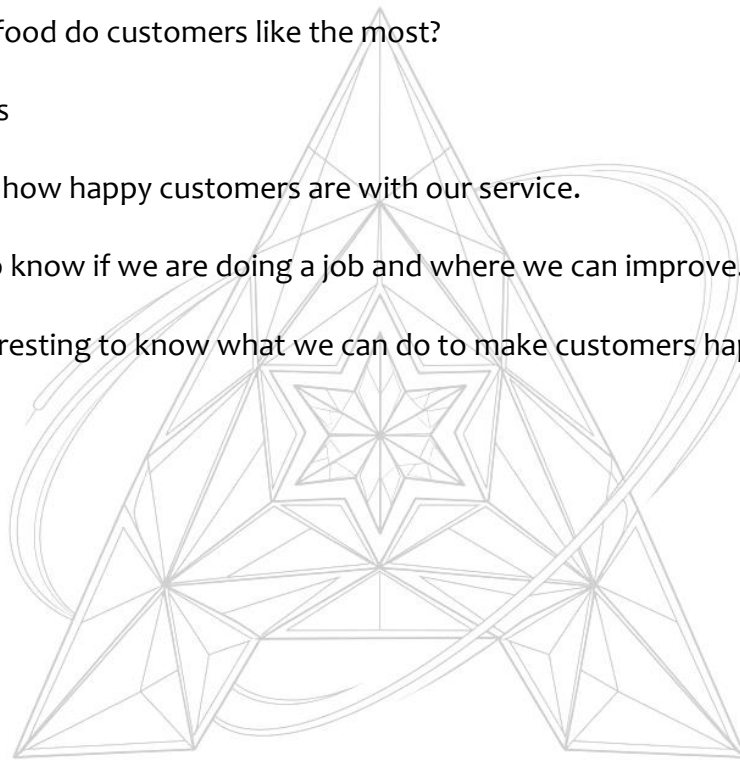

Which types of food do customers like the most?

Possible Insights

We want to see how happy customers are with our service.

We also want to know if we are doing a job and where we can improve.

It would be interesting to know what we can do to make customers happier.
