

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

TEAM ID	SWUTID - 2026-5802
PROJECT TITLE	Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau
MAX MARKS	2 MARKS

3.2 – Solution Requirement

To really understand how people order food and what they like we need a system that can collect and analyze a lot of data. This system should be able to help restaurants and food delivery services make decisions.

The system should be able to do the following things:

1. Collect Data

The system should be able to collect data about food orders from sources, including:

- * Information about the customers like their age, gender, job and city
- * Details about the orders like the order number, date, type of meal and type of cuisine
- * How many orders were. How much money was spent
- * What customers thought of their orders. How long it took to deliver
- * How people paid for their orders

2. Get Data Ready

The system should be able to connect to Tableau and get the data ready for analysis including:

- * Fixing missing information
- * Removing orders
- * Making sure dates and numbers are in the right format

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

- * Creating new fields like total revenue and average delivery time
- * Grouping customers by age and category

3. Create Dashboards

The system should be able to create dashboards that show important information, including:

- * Key numbers, like total orders, total revenue, average rating and average delivery time
- * Bar charts that show which cuisines and meal types are popular
- * Donut charts that show how customers rate their orders
- * Heat maps that show which cuisines are popular in cities
- * Line charts that show how orders change over time
- * Maps that show where orders are coming from

4. Analyze Consumer Trends

The system should be able to identify and analyze:

- * Which cuisines people like the most
- * Which meal types are popular like breakfast, lunch, dinner or snacks
- * How people of ages order food
- * How ordering trends differ from city to city
