

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

TEAM ID	SWTID – 2026-5802
PROJECT TITLE	Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau
MAX MARKS	5 MARKS

CHAPTER – IV PROJECT DESIGN

4.1 – Problem Solution Fit

Problem 1: We Do Not Know Enough About Our Customers

Solution: We can use customer behavior analysis dashboards.

Fit: These dashboards help businesses understand who their customers are and what their customers prefer to order. Customer demographic and behavior analysis is very important for businesses.

Problem 2: It Is Hard to Keep Track of Popular Food Choices

Solution: We can use cuisine demand analysis with bar charts and heat maps.

Fit: This clearly identifies the popular cuisines and meal categories. Cuisine demand analysis is a help to businesses.

Problem 3: We Do Not Know If Our Customers Are Happy

Solution: We can use rating analysis dashboards and KPI indicators.

Fit: These enable businesses to monitor customer satisfaction and improve service quality. Rating analysis dashboards are very useful for businesses.

Problem 4: Our Delivery Performance Is Not Good

Solution: We can use delivery time analysis and performance metrics.

Fit: This highlights delays. Helps optimize delivery operations. Delivery time analysis is very important for businesses.

Food Ordering Behavior and Consumer Trends: A Structured Analysis of Choices and Habits using Tableau

Problem 5: It Is Hard to Analyze Revenue

Solution: We can use revenue contribution dashboards and trend analysis.

Fit: This identifies the products and categories generating the revenue. Revenue contribution dashboards are very helpful.

Problem 6: We Are Not Making Good Business Decisions

Solution: We can use Tableau dashboards and story visualizations.

Fit: This converts data into actionable insights for strategic decision-making. Interactive Tableau dashboards are very useful for businesses.

Benefits of the Solution

- We get an understanding of customer behavior from customer demographic and behavior analysis.
- We can identify high-demand cuisines and meal types using cuisine demand analysis.
- We can monitor customer satisfaction better with rating analysis dashboards.
- Our delivery efficiency is enhanced with delivery time analysis.
- We get increased revenue visibility from revenue contribution dashboards.
- We can make faster. Data-driven decision-making with interactive Tableau dashboards.
- The dashboards are interactive and user-friendly.
- We have web-based access, through Flask integration.
